Global solutions for the citizen

**More than 145 years of
innovation, bringing us
ever closer to a better
and more sustainable
future**

Grupo Gimeno.

Grupo Gimeno is a family owned business group whose purpose is to offer urban services to citizens, tourism and industry. We're currently part of a new sector that seeks to address the main challenges humanity is facing – such as water shortage, increasing energy demand or urban density – contributing towards the transformation and progress of society in line with the United Nation's SDGs

Working for the people

ABOUT US - OUR MISSION

To be the global provider of services to citizens, tourism and industry.

WHERE WE'RE HEADING - OUR VISION

Commitment

A business project focused on social development

At Grupo Gimeno, we are committed to constantly and successfully searching for the balance between our business activity and the environment which surrounds us. For this reason, our companies' management strategy is thought up and developed while always taking into account the impact that they have on the environment, our clients, our team and society as a whole.

Commitment to education and outreach

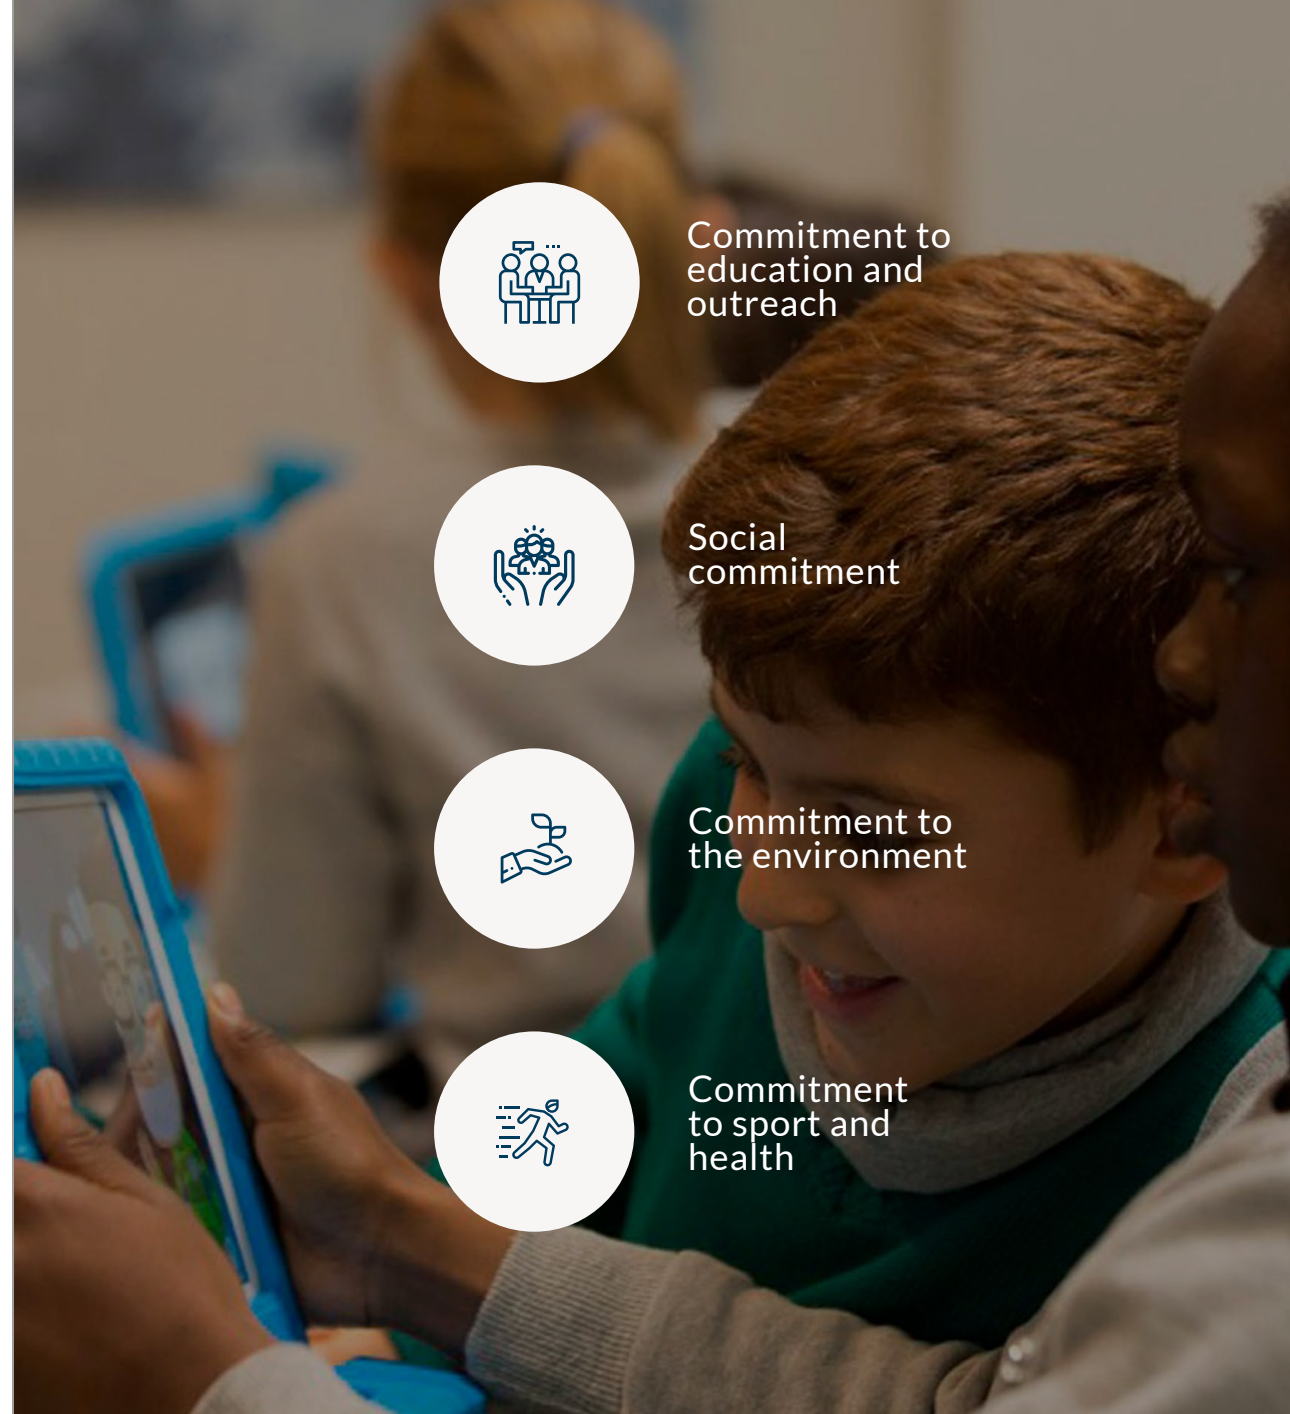

Social commitment

Commitment to sport and health

Commitment to education and outreach

We believe in the value of knowledge and transfer this knowledge as a way of social improvement. For this reason, we are opting for investing in training resources through our own initiatives and through collaborations with educational bodies and research centres.

We bet for the formation of our employees and young people, the development of opportunities and environmental awareness.

Social commitment

We endeavour to ensure that our business activity leaves a positive impact on society and our surroundings, both by undertaking our activity with corporate social responsibility in mind and carrying out initiatives that promote and drive this commitment.

Commitment to the environment

We are fully aware of the need to protect the planet, so therefore we always carry out our business activities following strict parameters in order to respect the environment. In addition, we are constantly researching and innovating in order to implement new ways to contribute to carrying out our activity in a sustainable manner so that we leave a positive impact on our surroundings.
